ACTIVITÉS ÉCONOMIQUES SELON LE SEXE, SUBDIVISIONS MUNICIPALES DE 30,000 HABITANTS ET PLUS, LIEU DE RÉSIDENCE ET LIEU DE TRAVAIL

INTRODUCTION

This report gives final figures for persons included in the labour force during the week prior to enumeration, classified by industry, showing sex, for incorporated cities and towns and other municipal subdivisions of 30,000 population and over, as reported at the June 1, 1971 Census. Table 9 presents figures for detailed industry (place of residence). Table 10 shows industry divisions, selected major groups and classes (place of work).

The data for cities and towns and other municipal subdivisions are presented from two points of view. In Table 9, the industries of the labour force resident in the areas are given. In Table 10, data derived by using the respondent's report of his or her place of work are presented to show the industrial distribution of the labour force working in the city, town or other municipal subdivision whether or not they were living within the area. These figures will differ from those based on residence for the following reasons:

- (a) some persons resident in the city, town or other municipal subdivision may work outside the area:
- (b) some persons resident in nearby communities may work inside the city, town or other municipal subdivision;
- (c) persons not stating their municipality of work are excluded from the place of work data:
- (d) the place of work reported by the unemployed portion of the labour force relates to their job of longest duration since January 1, 1970 and may not correspond with their usual place of residence on June 1, 1971.

Response errors are known to exist in the data by place of work. In multi-municipal urban centres it appears that some respondents reported the cannot be reported the cannot be reported the cannot be reported the cannot be reported that the name of the municipality where they actually worked. This response error may result in an overcount of the data for some subdivisions and an undercount for others.

In the 1971 Census, labour force refers to non-inmates 15 years and over, who, in the week prior to enumeration, worked for pay or profit, helped without pay in a family business or farm, looked for work, were on temporary lay-off, or had jobs from which they were temporarily: absent because of illness, vacation, strike, etc. Persons doing housework in their own home or volunteer work only, are excluded from the labour force. Also excluded are female farm workers who indicated that they helped without pay in a family farm or business for less than 20 hours. It should be noted that there are indications that the labour force counts for Quebec may be somewhat underestimated due to response problems. Further information regarding the labour force counts is available in the Population and Housing Research Memorandum (PH-EC-4) "Background Information on the 1971 Census Labour Force Data". This paper can be obtained on request from the Census User Inquiry Service.

The information in this report was collected on a 33 1/3% sample basis. Information on the sample and the weighting system can be found in the introductory report to this volume (see Catalogue No. 94-738).

The 1971 Census figures in this report have been subjected to a confidentiality procedure to prevent the possibility of associating small figures with any identifiable individual. The particular technique used is known as "random rounding". Under this method, all last or "unit" digits in a table (including all totals) are randomly rounded (either up or down) to "0" or "5". This technique provides the strongest possible protection against direct, residual, or negative disclosures without adding any significant error to the census data. However, since totals are independently rounded they do not necessarily equal the sum of individual rounded figures in distributions. Also, minor differences can be expected for corresponding totals and cell values in various census reports.

Ce bulletin présente les chiffres définitifs du recensement du ler juin 1971 en ce qui concerne les personnes comprises dans la population active au cours de la semaine précédant le dénombrement, selon l'activité économique et par sexe, pour les cités et villes constituées, et les autres subdivisions municipales de 30,000 habitants et plus. Le tableau 9 présente les chiffres pour l'activité économique (lieu de résidence). Le tableau 10 donne les divisions d'activité économique et certains grands groupes et classes (lieu de travail).

Les données pour les cités et villes et les autres subdivisions municipales sont présentées de deux points de vue. Le tableau 9 porte sur l'activité économique de la population active des secteurs. Au tableau 10, les données sont établies d'après le lieu de travail du recensé, ce qui indique la répartition par activité économique de la population active de la cité, de la ville ou de l'autre subdivision municipale, que les intéressés demeurent ou non dans le secteur. Ces chiffres différeront de ceux fondés sur la résidence pour les raisons suivantes:

- a) certains résidents de la cité, de la ville ou de l'autre subdivision municipale peuvent travailler en dehors du secteur:
- b) certains résidents de localités avoisinantes peuvent travailler dans la cité, la ville ou l'autre subdivision municipale;
- c) les personnes qui n'ont pas indiqué la municipalité où elles travaillaient sont exclues des données sur le lieu de travail;
- d) le lieu de travail indiqué par les chômeurs a trait à leur emploi de plus longue durée depuis le 1er janvier 1970 et peut ne pas correspondre à leur lieu de résidence habituelle le 1er juin 1971.

Les données par lieu de travail sont entachées d'erreurs de réponse. Il semble que dans les centres urbains multimunicipaux certains ont indiqué le nom de la ville principale comme lieu de travail plutôt que celui de la municipalité où ils travaillaient effectivement. Cette erreur de réponse peut entraîner une surestimation des résultats pour certaines subdivisions et une sous-estimation pour d'autres.

Au recensement de 1971, la population active comprend les non-pensionnaires d'institution de 15 ans et plus qui, au cours de la semaine précédant le dénombrement, ont travaillé contre rémunération ou en vue d'un bénéfice ou sans rémunération dans une entreprise ou une ferme familiale, ont cherché du travail, étaient en congédiement temporaire ou avaient un emploi dont ils étaient temporairement absents à cause d'une maladie, de vacances, d'une grève, etc. Les personnes faisant seulement des travaux ménagers chez elles ou du travail bénévole sont exclues de la population active. Sont également exclues les travailleuses agricoles qui ont indiqué avoir travaillé moins de 20 heures sans rémunération dans une ferme ou une entreprise familiale. Il est à noter que, suivant certaines indications, la population active du Québec est peut-être quelque peu sous-estimée, en raison de certaines difficultés d'interprétation. On trouvera de plus amples renseignements concernant les chiffres de la population active dans une Note de recherche sur la population et le logement (PH-EC-4) intitulée "Étude des données du recensement de 1971 sur la population active". Cette note de recherche peut être obtenue sur demande au Service-utilisateurs du recensement.

Les renseignements de la présente publication ont été recueillis sur un échantillon de 33 1/3 %. On trouvera des renseignements sur l'échantillon et le système de pondération dans l'introduction de ce volume (voir la publication nº 94-738 au catalogue).

Par souci de confidentialité, les chiffres du recensement de 1971 publiés ici ont été soumis à une formule qui interdit la possibilité d'associer des chiffres de faible importance à une personne reconnaissable. Cette technique particulière s'appelle l'"arrondissement aléatoire". Grâce à cette méthode, tous les derniers chiffres, c'est-à-dire les chiffres des unités (y compris tous les totaux) des tableaux sont arrondis de façon aléatoire (vers le haut ou vers le bas) à "0" ou à "5". Cette technique assure la protection maximale contre la divulgation directe, négative ou par recoupements, sans ajouter d'erreur significative aux données. Toutefois, puisque les totaux sont arrondis séparément, ils ne sont pas nécessairement égaux à la somme des chiffres individuels arrondis dans les distributions. De plus, il faut s'attendre que les totaux et les autres chiffres correspondants dans divers bulletins du recensement présentent quelques légères différences.

Place of work: Refers to the place where the person usually worked in performing the job reported. The job reported was that held by the person in the week prior to enumeration or, if not employed in that week, his or her job of longest duration since January 1, 1970. For persons with more than one job during the week prior to enumeration, the place of work was to be reported for the job at which they worked the most hours.

Place of residence: The place where a person usually lived. Persons with no usual place of residence on June 1, 1971 were enumerated where found.

Municipal subdivision: This term is used only in census publications to describe all categories of municipalities, both rural and urban e.g., municipal districts, boroughs, townships, as well as census subdivisions equivalent to municipalities.

Industry: The industry classes are based on the general nature of the business carried out in the establishment where the respondent was employed as indicated by the reporting of the name of the employer (or by the business name if self-employed) and the kind of business, industry or service engaged in by this establishment. If not employed in the week prior to enumeration, the information was to relate to the respondent's job of longest duration since January 1, 1970. Persons with two or more jobs were to report the information for the job at which they worked the most hours.

Industry is not to be confused with occupation, which refers to the kind of work the person was doing, as determined by the reporting of the kind of work, the description of the most important duties and the job title.

Industrial classification: Statistics Canada's Standard Industrial Classification Manual¹ was used as the basis for classifying information obtained by the industry inquiry. In the population census, a special class 005 was used for "Farms". Class 715 (Canadian Offices of Canadian-incorporated Companies Classified as Non-Canadian) was combined with class 707 (Investment and Holding Companies). Class 999 (Canadian-incorporated Companies Classified as Non-Canadian) was not used. The introduction to the Standard Industrial Classification Manual explains the nature and basis of the classification and gives other information on the classification system.

It should be noted that in this classification system, Government-owned and operated establishments primarily engaged in activities assigned to other industries, such as transportation, communication including post office, liquor sales, health and educational services, were classified to those industries rather than to Public Administration. The "Public Administration and Defence" Division covers establishments primarily engaged in activities that are basically governmental in character, such as the enactment of legislation, the administration of justice, the collection of revenue and defence.

The categorization into the three-digit Standard Industrial Classification classes in the census was performed through the use of a pre-coded list of establishments, where possible, to ensure uniformity with the classification of establishments by other Statistics Canada surveys.

Since a list of establishments was used to code the industry reported, some problems were encountered. These coding problems are most evident in industries dominated by multi-establishment firms — in particular when firms have more than one establishment at the same geographic location. As a consequence, there are some errors in the detailed industry data and some industry classes in manufacturing have been combined.

Comparability with earlier censuses: Due mainly to differences in definition and revision of the industrial classification, certain of the figures published in this report are not directly comparable to the industry statistics of earlier censuses. The Census Field, Statistics Canada, should be consulted when making comparisons.

The estimate of the mean square error for the characteristic covered in this report was not available at the time of publication. It will be available in the introductory report to this volume (Catalogue No. 94-738). Those users requiring this information prior to the release of the introductory report should contact the Census User Inquiry Service.

DÉFINITIONS

Lieu de travail: Lieu où le recensé travaille ordinairement dans l'emploi indiqué. L'emploi indiqué est celui que le recensé occupait dans la semaine précédant le dénombrement ou, s'il n'avait pas d'emploi au cours de cette semaine, l'emploi de plus longue durée depuis le let janvier 1970. Pour les personnes ayant occupé plus d'un emploi au cours de la semaine précédant le dénombrement, le lieu de travail se rapporte à l'emploi auquel elles ont consacré le plus grand nombre d'heures.

Lieu de résidence: Endroit où le recensé vit normalement. Les personnes sans lieu de résidence habituelle au 1er juin 1971 ont été recensées à l'endroit où elles se trouvaient.

Subdivision municipale: Ce terme n'est utilisé que dans les publications du recensement pour désigner toutes les catégories de municipalités tant rurales qu'urbaines (par ex., municipalités de district, boroughs, cantons) ainsi que toutes les subdivisions de recensement équivalant à des municipalités.

Activité économique: Les classes d'activité économique sont fondées sur la nature générale de l'établissement employant le recensé, déterminée par le nom de l'employeur (ou par le nom de l'entreprise s'il travaille à son compte) et par le genre de commerce, d'industrie ou de service dont s'occupe l'établissement. Si le recensé n'avait pas d'emploi au cours de la semaine précédant le dénombrement, les renseignements devaient porter sur son emploi de plus longue durée depuis le 1^{er} janvier 1970. Les personnes ayant deux emplois ou plus devaient fournir des renseignements pour celui auquel elles avaient consacré le plus grand nombre d'heures de travail.

Il ne faut pas confondre activité économique et profession. La profession est le genre de travail que faisait le recensé, déterminé par l'indication du genre de travail, la description des fonctions principales et le titre de l'emploi.

Classification des activités économiques: La "Classification des activités économiques" 1 de Statistique Canada a servi de base au classement de renseignements obtenus en réponse à la question relative à l'activité économique. Pour le recensement de la population, on a utilisé une classe spéciale 005 pour les "fermes"; en outre, la classe 715 (Bureaux canadiens de sociétés constituées au Canada considérées comme non canadiennes) a été réunie avec la classe 707 (Sociétés d'investissement et sociétés à portefeuille). La classe 999 (Sociétés constituées au Canada considérées comme non canadiennes) n'a pas été utilisée. L'introduction de la "Classification des activités économiques" explique la nature et la base de la classification et donne d'autres renseignements pertinents.

À remarquer que dans cette classification, les établissements appartenant à des administrations publiques et exploités par elles, mais dont l'activité principale ressortit à d'autres activités économiques telles que les transports, les communications (y compris les postes), la vente d'alcools et les services de santé et d'enseignement ont été classés dans ces activités économiques plutôt qu'à l'administration publique. La division "Administration publique et défense" comprend les établissements dont les activités ont un caractère essentiellement gouvernemental, comme la législation, l'administration de la justice, la perception des impôts et la défense.

Pour assurer l'uniformité de classification des établissements avec les autres enquêtes de Statistique Canada, on s'est servi, dans les cas où c'était possible, d'une liste d'établissements précodée pour le classement à trois chiffres suivant la Classification des activités économiques.

L'utilisation d'une liste d'établissements pour le codage de l'activité économique a posé certaines difficultés. Ces difficultés de codage sont les plus évidentes dans le cas des activités économiques dominées par des entreprises à établissements multiples, surtout quand les entreprises ont plus d'un établissement dans un même lieu géographique. Par conséquent, il y a des erreurs dans les données détaillées sur les activités économiques et certaines industries manufacturières ont dû être combinées.

Comparabilité avec les recensements antérieurs: À cause surtout des différences de définition et de la nouvelle Classification des activités économiques, certains chiffres du présent bulletin ne sont pas rigoureusement comparables avec ceux des recensements antérieurs. Il y aurait lieu de consulter le Secteur du recensement, Statistique Canada, avant de se livrer à des comparaisons.

L'estimation de l'erreur quadratique moyenne de la caractéristique donnée dans ce bulletin n'était pas connue au moment de la publication. Elle sera disponible dans l'introduction de ce volume (nº 94-738 au catalogue). Les utilisateurs désireux de connaître ce renseignement avant la publication du bulletin d'introduction devront s'adresser au Service-utilisateurs du recensement.

Publications of the Census of Canada, 1971

This report is one of the Volume Series of publications of the 1971 Censuses of Population, Housing and Agriculture. Altogether, there are some 225 reports in this series prepared in such a way that by removal of their covers the contents can be combined to form the materials comprising the 6 volumes and 25 separate volume parts in the entire series. A hard-covered binder, suitably titled, is included in the composite price to purchasers of the complete set of reports for any given volume part.

Catalogue of reports

A catalogue is available which describes the individual reports in the Volume Series of 1971 Census publications as well as reports in other series (i.e., Advance Series, Census Tract Series, and Special Series). The catalogue also includes a price list and an order form. A copy of this catalogue may be obtained from Publications Distribution, Statistics Canada, Ottawa K1A 0T6. For further information on census publications, address your inquiry to Information Division, Statistics Canada.

How to order reports

Orders for reports may be sent to Publications Distribution, Statistics Canada, Ottawa K1A 0T6, or to Publishing Division. Information Canada, Ottawa K1A 0S9. Enclose payment with your order in the form of a cheque or money order made payable to the Receiver General of Canada. If more convenient, census publications may be ordered from Information Canada bookstores in Halifax, Montreal, Ottawa, Toronto, Winnipeg, or Vancouver. For other details concerning deposit accounts, bulk orders, etc., contact Publications Distribution, Statistics Canada.

Other forms of publication

In addition to the tabulated results of the 1971 Census published in reports and bulletins, a large number of tables will be issued to users as copies of computer print-outs. These will also be available in microform. A variety of statistical tables may be purchased on computer "summary" tapes for further computer analysis by users. Details of the content, prices, and availability of census tabulations in these output media may be obtained from the User Inquiry Service, Census Field, Statistics Canada, Ottawa K1A 0T7.

Special tabulations

To the extent that confidentiality constraints permit, Statistics Canada will produce for users at cost, special tabulations not already included in the planned tabulation programme. Requests should be sent to the Census User Inquiry Service specifying clearly the precise classifications or cross-classifications and the geographic areas. The exact categories for each characteristic and a rough table layout should be included.

Maps and geographic files

Large-scale maps may be purchased to show the boundaries of enumeration areas (i.e., the territory covered by each Census Representative in taking the census), as well as small-scale maps of census divisions and other statistical areas. Supporting documentation relating to the census geographic files (i.e., place names, codes, etc.) are available in tabular form identifying the component enumeration areas of administrative and statistical units (e.g., towns, villages, municipalities, tracts). Further details, including costs to users, may be obtained from the User Inquiry Service of the Census Field of Statistics Canada.

Publications du recensement du Canada de 1971

Le présent bulletin fait partie de la série des volumes des recensements de la population, du logement et de l'agriculture de 1971. Cette série compte au total environ 225 bulletins présentés de telle sorte qu'en retirant leur couverture l'utilisateur peut les réunir et constituer ainsi les 6 volumes de la série, qui comprennent 25 parties distinctes. Un auto-relieur à couverture rigide portant le titre approprié est compris dans le prix d'achat de la série complète des bulletins constituant une partie de volume.

Catalogue

On peut se procurer un catalogue qui décrit chaque bulletin de la série des volumes du recensement de 1971, ainsi que les bulletins des autres séries (série préliminaire, série des secteurs de recensement et série spéciale). Le catalogue contient également une liste de prix et une formule de commande. On peut obtenir un exemplaire de ce catalogue en s'adressant à la Distribution des publications, Statistique Canada, Ottawa K1A 0T6. Pour tout renseignement complémentaire sur les publications du recensement, s'adresser à la Division de l'information de Statistique Canada.

Commandes de bulletins

Les commandes de bulletins peuvent être envoyées à la Distribution des publications, Statistique Canada, Ottawa K1A 0T6, ou à la Division de l'édition, Information Canada, Ottawa K1A 0S9. Toute commande doit être accompagnée d'un chèque ou d'un mandat établi à l'ordre du Receveur général du Canada. On peut aussi commander les publications du recensement aux librairies d'Information Canada de Halifax, de Montréal, d'Ottawa, de Toronto, de Winnipeg et de Vancouver. Pour plus de détails sur les comptes de dépôt, les commandes en gros, etc., s'adresser à la Distribution des publications, Statistique Canada.

Autres formes de publication

En plus des diverses publications contenant les résultats du recensement de 1971, de nombreux tableaux seront mis à la disposition des utilisateurs sous forme d'états mécanographiés. Ces tableaux seront également disponibles en microcopie. Les utilisateurs désireux de faire des analyses par des moyens mécanographiques pourront également se procurer un large éventail de tableaux statistiques sur bandes "sommaires". Pour tout renseignement sur le contenu, le prix et la disponibilité des résultats du recensement sur ces supports, s'adresser au Serviceutilisateurs, Secteur du recensement, Statistique Canada, Ottawa K1A OT7.

Totalisations spéciales

Dans la mesure où le respect du secret des données le permettra, Statistique Canada établira, à l'intention des utilisateurs qui en acquitteront les frais, des totalisations spéciales qui ne font pas encore partie du programme d'exploitation prévu. Il faut envoyer les demandes au Service-utilisateurs des données du recensement en précisant bien les classements ou recoupements et les régions géographiques. Il faut inclure les catégories exactes pour chaque caractéristique et une ébauche de la disposition des tableaux.

Cartes et fichiers géographiques

Les utilisateurs pourront se procurer des cartes à grande échelle indiquant les limites des secteurs de dénombrement (c.-à-d. des territoires recensés par chaque représentant du recensement) ainsi que des cartes à petite échelle des divisions de recensement et des autres secteurs statistiques. Les documents constituant les fichiers géographiques (noms, codes, etc. géographiques) sont disponibles sous forme de tableaux présentant les différents secteurs de dénombrement qui constituent les unités administratives et statistiques (par ex., villes, villages, municipalités et secteurs de recensement). Pour plus de détails et pour une indication des frais, s'adresser au Service-utilisateurs du Secteur du recensement de Statistique Canada.
